

*HER number*  
131

## Identification

*Name*  
Tb

*Morphotype*  
C1 (Podophage)

*Order*

*Family*  
?1

*Species*  
*Perisivirus Tb*

*Other designations*  
TB, Tbilisi

## Taxonomy

*Class*

*Realm*

*Kingdom*

## Images

*Image description*

Magnification: 297,000X

Bar: 50 nm

Staining: PTA

*Characteristics*

Plaques: 0.5- 1mm, clear, sloping borders.

Host is class III pathogen.

Albimi broth, Serum dextrose agar.

Growth time = 36 h.

*Genomic sequence*

Activated

## Propagation conditions

### *Bacterial hosts*
