Image description

Magnification: 297,000X

Bar: 50 nm

Staining: PTB

Characteristics

Plaques: 0.2- 0.5mm, clear, sloping borders.
Host is class 3 pathogen.
Lytic also fo *B.ovis* and rough strains of *B. abortus*.
Grows well on *B. canis* RM6/66.

Genomic sequence

Activated

Propagation conditions

Bacterial hosts

[1135](#)

Reference
