## Identification

<i>Genus</i>	<i>Species</i>	<i>Subspecies</i>	<i>Biovar</i>	<i>Serovar</i>
<i>Bacillus</i>	<i>thuringiensis</i>			
<i>Strain</i>		<i>Aliases</i>		
B16				

## Growth conditions

<i>Temp.</i>	<i>Medium</i>	<i>Aerobic/Anaerobic</i>	<i>Agitation</i>	<i>Other</i>
32	LB			

## Lysogeny

## Phage sensitivity

### *Reference*

Verheust, C., N. Fornelos, and J. Mahillon. 2005. GIL16, a new gram-positive tectiviral phage related to the \*Bacillus thuringiensis\* GIL01 and the \*Bacillus cereus\* pBClin15 element. J.Bacteriol. 187:1966-1973.

### *Remark*

The serovar of this strain remains unknown since it has only been recently identified as a *Bacillus thuringiensis* strain. B16 harbours the linear prophage pGIL16 and naturally releases GIL16 viral particles into the medium.
