

HER

1530

Identification

Genus	Species	Subspecies	Strain
Cellulophaga	baltica		4

Aliases

Growth conditions

Тетр.	Medium	Aerobic/Anaerobic	Agitation	Other
Room temp.	Zobell agar MLB broth		Agitation needed	

Lysogeny

Phage sensitivity

HER 530 (Cba41)

Reference

Remark

Takes three days to grow on Zobell agar pates, 16-20 hours to reach stationary phase in MLB, doubling time in MLB is 2-3 hours.

History
