

HER number  
131

## Identification

Name  
Tb

Morphotype  
C1 (Podophage)

Order

Family  
?1

Species  
*Perisivirus Tb*

Other designations  
TB, Tbilisi

## Taxonomy

Class

Realm

Kingdom

Image description

Magnification: 297,000X

Bar: 50 nm

Staining: PTA

Characteristics

Plaques: 0.5- 1mm, clear, sloping borders.  
Host is class III pathogen.  
Albimi broth, Serum dextrose agar.  
Growth time = 36 h.

Genomic sequence

Activated

Propagation conditions	
<i>Bacterial hosts</i> <a href="#">1131</a>
