Image description

Magnification: 297,000X

Bar: 50 nm Staining: PTA

Characteristics

Plaques: 0.5- 1mm, clear, sloping borders. Host is class III pathogen. Albimi broth, Serum dextrose agar.

Growth time = 36 h.

Genomic sequence

Activated

Propagation conditions Bacterial hosts 1131 Reference Brinley-Morgan, W. J. D. Kay, and D. E. Bradley. 1960. *Brucella* bacteriophage. Nature (London). 188:74-75.
