

HER number
132

Identification

<i>Name</i> S708		<i>Morphotype</i> C1 (Podophage)	
<i>Order</i>	<i>Family</i> ?1		<i>Species</i> <i>Perisivirus Pr</i>

Other designations
BM29

Taxonomy

<i>Class</i>	<i>Realm</i>	<i>Kingdom</i>	
--------------	--------------	----------------	--

Electron Micrograph

Image
FHRCEV

Image description

Magnification: 297,000X

Bar: 50 nm

Staining: PTB

Characteristics
Plaques: 1- 2.5mm, clear, sloping borders.

Genomic sequence
Activated

Propagation conditions

Bacterial hosts

[1131](#)

Reference

Morera-Jacob, M. 1968. New group of virulent bacteriophages showing differential affinity for *Brucella species*. Nature (London). 219:752-753.

Remarks

History

History

Isolated by

M. Moreira-Jacob,
National Laboratory of Veterinary Research,
Lisbon, Portugal

Date

1956

Received from

M. J. Corbel,
FAO/WHO Collaborating Centre for Reference and
Research on Brucellosis,
Ministry of Agriculture, Fisheries and Food,
Central Veterinary Laboratory,
New Haw, Weybridge, Surrey, England,
KT15 3NB
