

HER number 607				
Identification				
Name 607	Morphotype Siphophage	Other designation	S	
Taxonomy				
Realm	Kingdom	Phylum	Class	
Order	Family ?1	Genus Jouyvirus	Species	
Images				
Electron Micrograph		Image description	Image description	
Characteristics Temperate phage ?-like		Genomic sequence Activated	Genomic sequence Activated	
Propagation of	onditions			
Bacterial hosts 1605				
	, M., Deng, L. et al. Virulen nfectious than temperate co		children fecal samples are 1, 378 (2020).	
Remarks THIS PHAGE WII	LL BE AVAILABLE SOON			
History				

History Received from Marie-Agnès Petit INRAE (France)	Date
Isolated by Aurélie Mathieu INRAE (France)	Date
