

HER number  
536

## Identification

|             |            |                           |  |
|-------------|------------|---------------------------|--|
| Name<br>536 | Morphotype | Other designations<br>Î±3 |  |
|-------------|------------|---------------------------|--|

## Taxonomy

|       |                        |                        |                                 |
|-------|------------------------|------------------------|---------------------------------|
| Realm | Kingdom                | Phylum                 | Class                           |
| Order | Family<br>Microviridae | Genus<br>Alphatrevirus | Species<br>Alphatrevirus alpha3 |

## Images

|                     |                               |
|---------------------|-------------------------------|
| Electron Micrograph | Image description             |
| Characteristics     | Genomic sequence<br>Activated |

## Propagation conditions

Bacterial hosts  
1536
